VALUE ADDED COURSE

ACADEMIC YEAR: 2022-2023

To enhance the quality in academic and administrative domains, various IQAC strategies are institutionalized so as to keep in pace with the expectations of stakeholders like students, industry and society.

Skills and knowledge inculcated beyond curriculum education is necessary to succeed in today's world. Our college believes in nurturing the students into a wholesome professional and hence our students are encouraged to undergo Value Added Courses and attend workshops. These courses develop in them an urge to keep them updated on the latest trends and improves their technical skills further.

These courses offer our students an edge over the others and have the following advantages:

- 1.Enhances learning skills, technical knowledge, creativity and ability to innovate.
- 2.Exposure to recent trends in the core field augmenting the employability of the students.
- 3.Ability to compete with students at a global level. 4.Enables students to learn and understand the use of modern research tools.
5. The value added courses are offered for all the students in the eighth semester.
- 6.The students are divided into batches of 30 to 40 for better learning. In the academic year 2022-2023 all the final year students from all the branches have benefited from these courses.

Name of the few courses attended by the students of various branches include Solar PV System Design and Installation, Design and Development of Robotics, Product design and development in power electronics and embedded systems, Sensor applications using Arduino and Raspberry Pi, Ethical Hacking, Block Chain and Cryptocurrencies and Full Stack Development, Communication and Image Processing Using MATLAB, Embedded System Interfacing with arduino and Robotics, etc.,

The sample VAC report of CSE department and the certificates of few other VAC courses attended by the other departments are attached.

Sl No	Name of the Course	Year	Organization / Institute	Course Duration	Date Conducted	No of Students Attended	Course Objective
1.	Sensor applications using Arduino and Raspberry Pi	IV	NITTTR	5 days	18-01-2023 to 23-01-2023	41	The main objective of this course is to provide an overall exposure to the technology of sensor applications using Arduino and Raspberry Pi
2.	Solar PV system design and installation	IV	TIAS Energy Pvt Ltd, Chennai Power Projects	5 days	18-01-2023, 19-01-2023 & 23-01-2023 20-01-2023 to 21-01-2023	40	The main objective of this course is to provide an exposure to plan and installation on solar PV system
3	Design and development of Robotics	IV	Retech Solutions, Chennai	5 days	18-01-2023 to 23-01-2023	40	The main objective of this course is to give exposure about how to use Arduino and Raspberry Pi to control robot, while providing step by step instructions on the entire robot process
4	Product design and development in power electronics and embedded systems	IV	EmCog Solutions, Chennai	5 days	18-01-2023 to 23-01-2023	40	The main objective of this course is to deal with the design and development of products in power electronics and embedded systems

COMPANY PROFILE

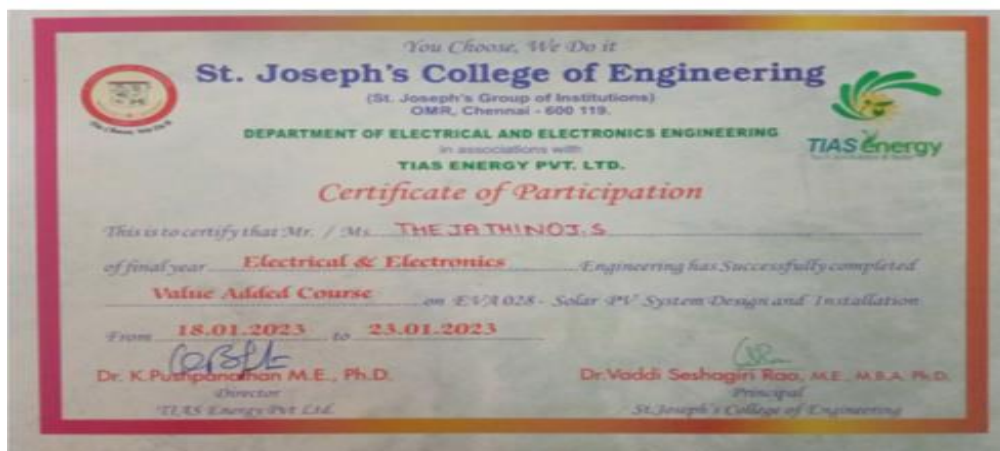

NITTTR, CHENNAI

In the quest of knowledge and with a mission to empower the technical teachers in their becoming excellent human resources and to contribute meaningfully to the Nation and the human society, National Institute of Technical Teachers Training and Research, Chennai has acquired the status of one of the premier technological institutions of India, for training the technical teachers from engineering colleges and polytechnic colleges. It also offers post graduate programmes in the field of Education Technology, and Human Resources Management in the line of the Nation's pursuit for regaining its position in a greater domain of advancement of the human society. Institute is also Ph.D. Programme in the areas of Engineering, Educational Technology, Educational Management, Engineering Education etc. It is also planned to offer additional Masters programmes to tap the potential of students in interdisciplinary area.

POWER PROJECTS

Power Projects provides power system consulting services to power utilities and industries in Indian & global markets. We offer solutions and recommendations from small-scale industrial system to highly complex national grid level networks.

Power Projects established in the year of 2006, We are committed to exceed the expectations of clients by providing cost effective, innovative solutions without compromising the quality of service that we offer. Our skills include every aspects of electrical engineering needs like, Power System studies consulting services, Detailed engineering, Design engineering, & Technical Support. Largest and most experienced teams of power system engineers in the industry, with industry standard software & advanced modeling and analysis capabilities at their fingertips

Are constantly thriving to create an impact on society through education and innovations. As we are interested in multi-disciplinary engineering fields we have started working on various electro-mechanical systems operatable by computer software. To build self-sustainable startups in the fields of machinery and electric drive systems. To build a strong network under one roof for machines, robots and electric aircrafts.
