OPEN **Biochar carbon nanodots for catalytic acetalization of biodiesel by-product crude glycerol to solketal: process optimization by RSM and life cycle cost analysis**

Supongpanle Ao¹, Shiva Prasad Goude¹, Lakshi Saikia¹, Besker Gurunathan¹ & Samuel Lalthazuala Rokhum^{2,3}

Carbon-based nanodots have garnered recent interest for their simple synthesis and versatile utility, ranging from biomedical to (opto) electronic applications, evolving into a tunable and biocompatible material. Here, for the first time, a biochar (lotus leaf) derived carbon nanodots was synthesized through hydrothermal carbonization. The synthesized hollow spherical biochar was engineered via functionalization by grafting $-SO_3H$ active sites. The attained catalyst was broadly analyzed by XRD, FTIR, TGA, BET, SEM-EDX, TEM, and XPS analysis after which it was applied for the acetalization reaction of crude glycerol (a biodiesel by-product) to form solketal, a potential fuel additive to valorize the large waste stream generated from biodiesel industry. Employing the RSM-CCD methodology, the experimental matrix was executed, and subsequent data were scrutinized through multiple regressions to model a quadratic equation. Under specific reaction parameters—a reaction duration of 14 min, a molar ratio of 7.5:1, and a catalyst loading of 5.7 wt.%, maximum solketal yield (95.7%) was attained through the ultrasonication method. Finally, to conclude, life cycle cost analysis (LCCA) for solketal production was studied here which determined the overall cost of solketal production per kilogram to be 0.719 USD (\$), indicating high commercial applicability.

Keywords: Biochar, Carbon nanodots, Acetalization, Solketal, Life cycle cost analysis

Respected sir,

Referring to the subject as mentioned above, I am **Dr.E.Ahila Devi**, the department coordinator NAAC, on the behalf of entire department, here presenting you the briefs of activities undertaken by the department.

Sl. No.	Event with Photo	Description
1	24 HOURS HACKATHON	Date: 29 & 30 th August 2024 Venue: Placement Block Nature of Event: 24 hrs Hackathon

HACKATHON

Participants: 33 Teams

Organized by: Department of CSE

Objective:

- Develop new solutions, products, or technologies in a short time frame, pushing the boundaries of creativity and problem-solving.
- Bring together diverse individuals to work as a team, share knowledge, and build professional connections.
- Provide hands-on experience to learn new skills and tools while rapidly prototyping and testing ideas.

Outcome:

- Fresh ideas, prototypes, or solutions that address specific problems or create new opportunities.
- Strengthened relationships and improved teamwork among participants, often leading to future collaborations.
- Enhanced skills and knowledge for participants through hands-on experience and problem-solving.

Nature of Event: Alumni talk

Participant: IV-year Students

Organized by: Department of CSE

Objective:

- Alumni talks can facilitate networking opportunities between current students and alumni.
- Alumni talks often aim to provide current students with valuable insights into various career paths, industries, and professional experiences.
- Alumni may share their career journeys, lessons learned and advice for navigating the job market.

Outcome:

- Alumni talks create opportunities for attendees to connect with alumni who may serve as valuable mentors, advisors, or contacts in their desired field.
- Building relationships with alumni can lead to internships, job opportunities, and professional connections that can benefit attendees throughout their careers.

3	Industrial Visit - AI- Cloud Solutions	

INDUSTRIAL VISIT

Date: 08.08.2024

Venue: AI- Cloud Solutions

Nature of Event: Industrial Visit

Participants: III YEAR CSE A, B, C

Organized by: Department of CSE

Objective:

- Provide practical insights into how industrial processes and operations work, complementing theoretical knowledge.
- Familiarize participants with real-world applications, technologies, and best practices used in the industry.
- Offer a glimpse into potential career paths, company cultures, and job roles within the industry.

Outcome:

- Gained practical knowledge of industrial processes, technologies, and operations.
- Exposure to industry practices, challenges, and solutions, bridging the gap between theory and practice.
- Increased awareness of potential career opportunities and insights into different roles and company cultures.

The placement guidance session on August 18, 2024, featuring Reshma R B, a Packaged App Development Analyst at Accenture, provided invaluable insights into the company's recruitment process and expectations for candidates. Reshma, an alumna of the 2018-2022 batch, outlined the various stages of the recruitment process, emphasizing the importance of aligning skills and experiences with Accenture's requirements. She highlighted the technical and soft skills crucial for success in the tests and interviews, offering practical advice on resume crafting and interview preparation. The session significantly benefited participating students by enhancing their understanding of the recruitment process, boosting their confidence, and improving their preparedness for upcoming placement opportunities at Accenture.

3.C) IEEE Event 3

The poster is for an event titled "Future - Proofing Industry 4.0 : The role of Machine Learning and SDN in Enhancing Network Security". It is organized by the Department of Electronics and Communication Engineering at St. Joseph's College of Engineering, Chennai. The event is in association with the IEEE Communications Society and IEEE PEP Data Science & Analytics. The speaker is Dr. Neena Susan Shaji, a Professor at BITS Pilani, Dubai, with a research domain in Network Security. The event is scheduled for Friday, August 2, 2024, from 6:30 pm to 7:30 pm via Google Meet. The poster also features logos for IEEE ComSoc, IEEE, and St. Joseph's Group of Institutions, along with a 31st anniversary logo.

Report

On August 2, 2024, an insightful online seminar was conducted on Google Meet, focusing on the theme "Future-Proofing Industry 4.0: The Role of Machine Learning and SDN in Enhancing Network Security." The session was led by Dr. Neena Susan Shaji, a distinguished professor at BITS Pilani if Dubai campus, who shared valuable insights into the integration of machine learning and Software-Defined Networking (SDN) to fortify network security in the context of Industry 4.0.

3.D) IEEE Event 4

Report

St. Joseph's College of Engineering's ECE department successfully conducted an IEEE Communications Society registration drive on August 6th for 2nd-year students. The event aimed to introduce students to the world of IEEE and the opportunities it offers. With the goal of empowering young minds and building future leaders, the drive encouraged students to explore the benefits of IEEE membership and participate in its various initiatives.

The IETE chapter of the ECE department organized a successful event for second-year students to introduce them to the activities of IETE and encourage their participation. Twenty teams competed in a three-round quiz, with nine teams advancing to the final round. The final round focused on public speaking skills, and the judging panel evaluated presentations and content delivery.

The first round featured a pen and paper quiz consisting of ten technical questions on basic electronic concepts and ten non-technical aptitude questions. This round tested the fundamental knowledge of the participants.

In the second round, participants were challenged with a picture association task. Four images were displayed, and the teams had to identify the one common word linking all of them.

The final round was designed to assess and enhance the public speaking skills of the participants. Each team was provided with a topic and specific instructions on how to approach it—whether as a debate, a speech, a marketing strategy, a sponsorship pitch, or a mock interview.

LOCATION - DAZZLING STONE, KUNDRATHUR

St. JOSEPH'S
GROUP OF INSTITUTIONS
OMR, CHENNAI - 119

*The Choice of
Disciplined Toppers*

On August 29, 2024, ECE students from St. Joseph's College of Engineering visited Dazzling Stone Orphanage in Kundrathur. The day was filled with heartwarming interactions and unforgettable moments with the children. We were amazed by their talents, engaged in fun activities, and witnessed the dedication of the orphanage staff. Our visit was a reminder of the positive impact we can make on the lives of these children through small acts of kindness.

6.A) Industry collaboration Interaction -1

Report

On August 29, 2024, the ECE Department faculties have visited Renault Nissan Automotive India Private Limited, Oragadam, to discuss potential collaborations. The visit included a company overview, a tour of their facilities, and productive discussions with Renault Nissan's talent management and learning and development heads. The key areas of collaboration explored were student placements, internships, and joint research projects. Renault Nissan expressed enthusiasm for these initiatives, and the department will follow up to ensure their successful implementation.

6. B) Industry collaboration Interaction -2

Report

ECE Department faculties visited **Data Patterns (India) Ltd., Chennai**, to discuss establishing a Center of Excellence (CoE) on our campus. During the meeting with Mr. Soundarapandiyan and Mr. Karthick, they have explored the potential objectives, structure, and implementation strategies for the CoE. The primary goals include fostering knowledge sharing and developing talent to enhance core placements. To achieve these objectives, we discussed allocating resources, providing lab facilities, and equipping the CoE with component-level evaluation boards to facilitate students in meeting industry requirements for design and product development.

6.C) Industry collaboration Interaction -3

Report

Electronics and Communication Engineering faculties recently visited **Vaan Megam Networks and Vaayusastra**, two prominent companies in the IITM Research Park, Chennai. Vaan Megam Networks, a leader in 5G services, offers test-as-a-service solutions for enterprises, telecom, and system integrators. Vaayusastra specializes in drone engineering and manufacturing. During their visit, our faculty had in-depth discussions with Mr. S.H. Muthukumar, the CEO, about potential collaborations, including the possibility of signing a Memorandum of Understanding (MoU), providing guidance to startups, and offering internship and industry-academia partnership opportunities.

6. D)Industry collaboration Interaction -4

Report

ECE Faculty Visit to Healthcare Technology Innovation Centre (HTIC)

Our ECE faculty members recently visited the Healthcare Technology Innovation Centre (HTIC) at IITM Research Park, Chennai. HTIC, a collaborative venture between IIT Madras and the Government of India, is dedicated to developing cutting-edge healthcare technologies. During the visit, we engaged in fruitful discussions with Dr. Nabeel P M, Lead Research Scientist, to explore potential collaborations

6.E) Industry collaboration Interaction -5

Report

On 6th August 2024, Sathish Gurumoorthy, Enterprise Architect at HCLTech specializing in Aerospace, Rail, and Automotive had a discussion with principal for industry- institution collaboration with Electronics and communication engineering department.

 OMR, CHENNAI - 119

The Choice of Disciplined Toppers

On August 12, 2024, third-year Electronics and Communication Engineering students from St. Joseph's College of Engineering embarked on an enriching educational excursion to the Indian Space Research Organization (ISRO) facility in Sriharikota. The visit offered students a unique opportunity to witness firsthand the cutting-edge advancements in India's space program and to grasp the practical relevance of their academic pursuits.

7. B) Industrial Visit -2

Report

On August 6, 2024, a group of 51 students from the ECE department visited the Pondicherry Lighthouse. The students were welcomed by the lighthouse authorities and received a comprehensive briefing on the lighthouse's history, purpose, and operations. They also enjoyed a guided tour, exploring the various navigational equipment and learning about the challenges of maintaining such a vital landmark.

7.C) Industrial Visit -3

Report

On August 7, 2024, a class of ECE students from SJCE visited the Pondicherry Lighthouse, where they were divided into smaller groups for effective interaction. They attended an introductory session and a guided tour, gaining insights into the operational principles and technology of lighthouses, including lighting and navigation. The students explored the historical significance and technological advancements of lighthouses, recognized their critical role in maritime safety and navigation, and learned about the maintenance procedures and challenges faced by lighthouse authorities. The visit provided a comprehensive understanding of lighthouse operations and their importance in ensuring safe maritime navigation

7.D) Industrial Visit -4

Report

ECE Final year students from St. Joseph's College of Engineering embarked on a fascinating journey to the Pondicherry Lighthouse on August 7, 2024. They have gained valuable insights into its operations, history, and significance in maritime navigation. They learned about the technology used, the challenges faced by lighthouse authorities, and the critical role lighthouses play in ensuring safe navigation. This educational experience enriched the students' understanding of maritime infrastructure and its importance.

The Department of Electronics and Communication Engineering at St. Joseph's College of Engineering (SJCE) recently conducted a school event program for Class 11 and 12 students from All Angels Matriculation Higher Secondary School in Chennai. The event provided students with a comprehensive introduction to the field of Robotics, featuring interactive quizzes, hands-on project demonstrations, and expert guidance. The workshop was a resounding success, inspiring students to explore Robotics further and nurturing their interest in technology.

9. JETSIGNUM' 24 A National Level Technical Symposium

Report

The National Level Technical Symposium JETSIGNUM'24, held on August 31, 2024, was a resounding success. With 316 participants from 42 colleges, the event showcased the vibrant and innovative spirit of engineering students. The symposium featured a variety of technical events, where teams competed for prizes. The winners of the I, II, and III prizes received cash rewards of Rs. 3000, Rs. 2000, and Rs. 1000, respectively. The symposium provided a platform for students to showcase their skills, network with peers, and learn from industry experts. A total of Rs. 30,000 prize money was awarded.

9. FDP/Workshop:

The following staff member have participated in various FDP/Workshop conducted by other institutions during the month of August at National/International level.

S.NO	Name of the Faculty	Title of the professional development program	National / International	Workshop/ FDP/Conference/STP	Date and Duration (from – to)	No. of Days	Place of the Program/ Conducted by

Subject: Brief report on the monthly activities undertaken by EEE department for the August month 2024 year

Respected Sir

Referring to the subject as mentioned above, I am Mr.S.S.Harish the department coordinator NAAC, on the behalf of entire department, here presenting you the briefs of activities undertaken by the department.

Description about the various activities and corresponding remark on its status of execution

Sl. No.	Photographs Captured During Events	Corresponding remarks (Minimum 300 words)	C
1.	Industrial visit- 4 th year	As a part of industry institutional teaching, Department of EEE of St. Joseph's College of Engineering has organized an Industrial Visit to 110KV Kadaperi Substation Tambaram for A section and North Chennai thermal power station Athipattu for the final year students of B and C on 9 th , 16 th and 12 th August 2024 respectively.	

PIC: EVENT PHOTO

2. Industrial visit- 3rd year

III-year EEE - A visited at 110KV KADAPERI SUBSTATION, TAMBARAM on 14/08/2024

III-year EEE - B visited at 110KV KADAPERI SUBSTATION, TAMBARAM on 13/08/2024

III-year EEE - C visited at 110KV KADAPERI SUBSTATION, TAMBARAM on 16/08/2024

PIC: EVENT PHOTO

As a part of industry institutional teaching, Department of EEE of St. Joseph's College of Engineering has organized an **Industrial Visit to 110KV Kadaperi Substation Tambaram for the third year students on 13th, 14th and 16th August 2024.**

<p>3.</p>	<p>Entrepreneurship Cell- Idea spark</p> 	<p>On August 7, 2024, the Entrepreneurship Cell of St. Joseph's College of Engineering hosted IDEA SPARK, an impactful event dedicated to innovation and entrepreneurship. Held at the Indoor Auditorium and the AV Hall Library, the event attracted enthusiastic participation and fostered a dynamic atmosphere for showcasing creativity. Mr. R Ambalavanan, IA & AS Officer and Director of the Entrepreneurship Development and Innovation Institute Tamil Nadu, delivered a keynote address emphasizing the pivotal role of entrepreneurship in driving both regional and national development.</p> <p>Dr. Partheepan Rudrapati, CEO of Knowledge Xchange Community & Academic2IT, followed with a compelling session on bridging the gap between academic knowledge and practical application.</p>
<p>4.</p>	<p>GUEST LECTURE</p>	<p>Our department organized a guest lecture for second year students on the topic “Impacts of over voltages in Power Systems” by Dr. T. Saravanakumar, Project Engineering Senior Professional, Hitachi Energy, Chennai at Library AV Hall on 9th August 2024. The speaker briefed about the general Components of EV, Wireless Power transfer Techniques and discussed about the role and functionalities of protection board, filter board, PFC board, Capacitor board, inverter board, and System board.</p>

PIC: EVENT POSTER

5. GUEST LECTURE

Our department organized a guest lecture on the topic “Design and debug of embedded systems” by **Mr.Hareesh Janakiraman ,Director , Embeddedguru LLC Texas** at **Library AV Hall** on 12th August 2024 for third year students and 13th August 2024 for fourth year students. Students gained a deep understanding of embedded systems design principles and real time processing. Improved their debugging skills for more efficient problem-solving in embedded systems. The lecture provided an industrial talk on industry –standard tools in embedded systems design and debugging.

6.

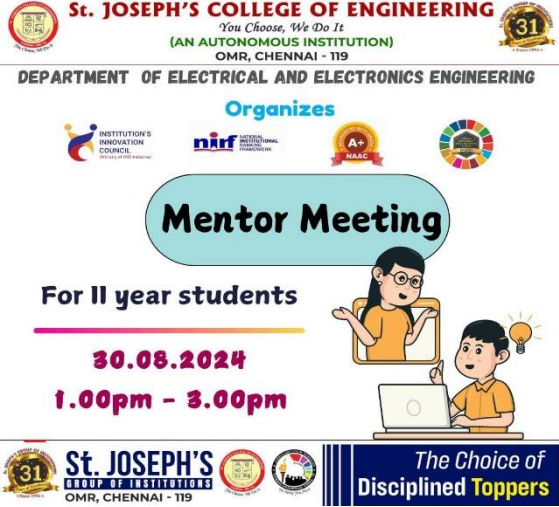

NGO Visit

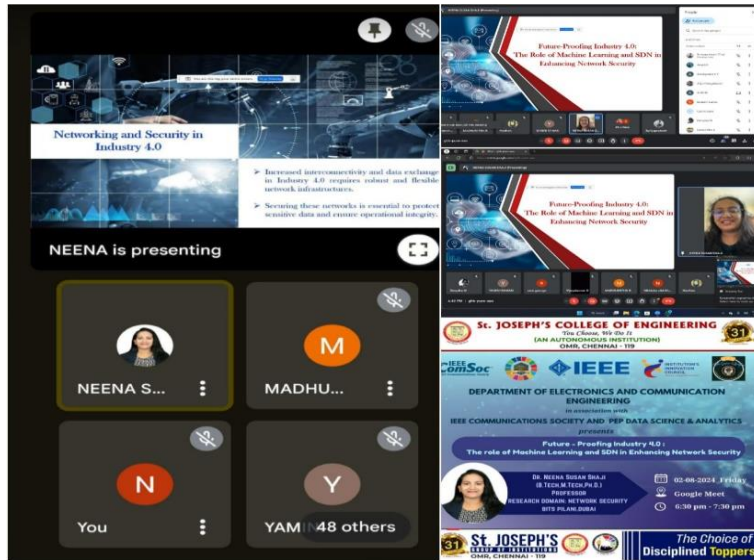

PIC: VISIT PHOTO

Our second year students have visited orphanage, old age homes and served food and interacted with them and perform some activities for making them happy. They supported the homemates by providing groceries.

Date	YEAR/ SECTION	NGO PLACE DETAILS
14/08/24	II/B	Anbu thondu illam, chengelpet
14/08/24	II/C	CSI Mahimai illam, chengelpet

<p>7.</p>	<p style="text-align: center;">Mentor Meeting</p>  <p style="text-align: center;"><i>PIC: EVENT POSTER</i></p>	<p>On 30th August 2024, Department of Electrical and Electronics Engineering at St. Joseph's College of Engineering, conducted Mentor meeting for II year students. Students were motivated to do NPTEL and other online courses on emerging Technology. Mentors motivated the students to participate in various project competition .Also they emphasised the importance of Skillrack.</p>
<p>8.</p>	<p style="text-align: center;">IEEE activities</p>	<p>IEEE Communication Society & APS SJCE SB -AG and IEEE St. Joseph's College of Engineering student chapter conducted an online webinar session on 02-08-2024. The topic for the <u>session</u> was "THE ROLE OF MACHINE LEARNING AND SDN IN ENHANCING NETWORK SECURITY" presented by Dr. Neena Susan Shaji Professor BITS Pilani, Dubai. Students from the Final year and pre-final year of the Department of Electronics and Communication Engineering participated. She discussed in the topics of Future Proofing Industry 4.0 and explored about SDN, security of SDN, Networking and Security, Vulnerabilities Applications of ML, and Applying ML for Detecting Attacks and the Career opportunities in this field is discussed by her. Approximately 50+ students took part in this event over Gmeet.</p>

IEEE activities

On August 3, 2024, the IEEE St. Joseph's College of Engineering Student Branch Chapter(IEEE SB 60101)hosted the inaugural session of Space Exploration 4.0. The event, which began at 7:00 PM, featured a captivating presentation by **Dr. Jeevan Perara, a NASA aerospace engineer**. Dr. Perara provided an in-depth overview of the Space Shuttle Columbia accident, discussing the critical moments and the impact on space exploration protocols. The session was attended by a total of 40 participants, including students, faculty, and space enthusiasts, who engaged actively in the discussion and Q&A segment. This successful kickoff is just the beginning of our journey into space exploration, and we look forward to bringing more exciting sessions in the future. **The event provided valuable insights into the Space Shuttle Columbia accident and fostered engaging discussions with the aerospace expert**

IEEE activities

"The IEEE SIGHT Affinity Group, in collaboration with IEEE SJCE Student Branch, hosted an enriching online webinar titled '**Mental Health Unplugged-Online Therapy and Tech-Based Self-Care**'" on August 8,2024 counselling psychologist and a PhD Scholar **Ms. Pavithraksmi K M** shared invaluable insights on navigating life's challenges and extracting wisdom from personal experiences. Approximately 35 participants from diverse backgrounds joined the session, which emphasized the transformative power of technology in empowering positive change. Through engaging discussions and practical advice, attendees were inspired to embark on a journey of self-improvement and success. The webinar, conducted via Google Meet, provided a platform for meaningful interaction and learning.

------------	-------------------------------

The "ENERGIZE QUIZ," event is organized by the IEEE Power and Energy Society of St. Joseph's College of Engineering on August 8, 2024, was an impactful online event dedicated to raising awareness about the crucial role of renewable energy in addressing climate change. Spanning from 8:00 AM to 10:00 PM, the quiz offered participants a unique opportunity to delve into the environmental benefits of sustainable energy sources, such as solar and wind, which are essential in reducing greenhouse gas emissions and fostering a cleaner, more sustainable future. The event was meticulously designed to not only test the knowledge of participants but also to educate them on the latest innovations and best practices within the renewable energy sector. A significant highlight of the quiz was the enthusiastic participation from students across various disciplines, demonstrating a widespread and growing interest in renewable energy. These students engaged deeply with the content, showcasing their commitment to understanding the complexities of sustainable energy and its pivotal role in global environmental stewardship. The event's format encouraged critical thinking and allowed students to explore the latest

advancements in renewable energy technologies, thereby broadening their perspectives and inspiring them to contribute to this vital field

13.

IEEE activities

IEEE St. Joseph's College of Engineering Photonics Society SJCE SB PH036(SBC60101L) hosted the event "ELEVATE - Mastering LinkedIn for Career Growth" on August 13, 2024, featuring [Ms. Naeema Nazar, an Assistant Professor at VISAT Engineering College](#), IEEE Photonics Society Global Strategy Representative for India, Kerala Student Branch Chapter Advisor of WiE, Comsoc. The session, held via Google Meet, focused on "Mastering in LinkedIn for Career Growth," providing insights building a strong profile that clearly reflects your professional identity. Mam's presentation emphasized in Mastering LinkedIn is essential for boosting your professional visibility and connecting with valuable opportunities. It enhances your personal brand and positions you for career growth in a competitive job market. Nearly 30 students participated in this event.

Yazhini. N, Yashwanth. D, Anaandh. J, Sowndharya. M for raising voice for Tamil Language.

15.

IEEE activities

The IEEE Power Electronics Society Madras Chapter, in collaboration with the IEEE Power Electronics Society SJCE Student Branch, organized a webinar titled "Charting out a Successful Career in Semiconductors - Lessons Learned" on August 18th, 2024, at 7:30 PM IST. The session was conducted by Mr. Rakesh Kumar, an IEEE Life Fellow and candidate for IEEE VP-Elect 2025. With his extensive experience in the semiconductor industry, Mr. Kumar provided participants with valuable insights into building a successful career in this field. He discussed the critical skills and knowledge required, highlighted various career pathways, and shared lessons learned from his own career journey. The webinar also covered current industry trends and the importance of staying updated with technological advancements. The event concluded with an engaging Q&A session,

where attendees had the opportunity to ask questions and receive practical advice.

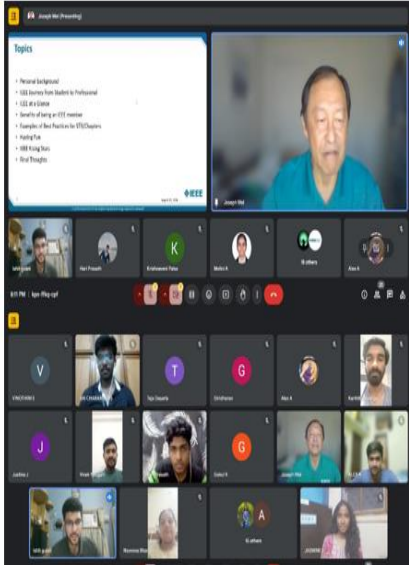

16.

IEEE activities

PIC: EVENT POSTER & PHOTO

IEEE SJCE Student branch in collaboration with IEEE JSS Academy Student Branch and IEEE Signal Processing Society hosted a webinar series on August 5, 2024, the IEEE community witnessed an enlightening event, "**Voices of IEEE**," focusing on the pivotal role of the Signal Processing Society in career management. Esteemed speaker **Dr. ARUN BALODI from IEEE Signal processing society shared his insights on how signal processing expertise can significantly enhance career opportunities.** He discussed the growing demand for signal processing professionals in sectors like telecommunications, healthcare, and finance. Attendees gained valuable knowledge on the latest trends, tools, and techniques in signal processing, as well as tips on leveraging these skills for career advancement. The interactive Q&A session allowed participants to engage directly with the experts, making the event highly informative and impactful. The event underscored the importance of continuous learning and professional development within the IEEE community

<p>17.</p>	<p style="text-align: center;">IEEE activities</p> <div style="display: flex; justify-content: space-around;">   </div> <p style="text-align: center;"><i>PIC: EVENT POSTER & PHOTO</i></p>	<p>IEEE St. Joseph's College of Engineering Student Branch, in collaboration with IEEE CVR College of Engineering, hosted an enlightening webinar series on August 19, 2024. The event, "Voices of IEEE," featured Dr. Joseph Wei, a distinguished IEEE Board Member and expert in "tech for the elderly." Dr. Wei delivered an insightful talk on the "IEEE Journey from Students to Professionals and the Benefits of Volunteering," sharing his experiences and advice on transitioning from student roles to professional careers. He emphasized how active involvement in IEEE can enhance career opportunities and provide valuable professional development. The session included practical tips on leveraging IEEE resources for career growth and featured an interactive Q&A segment where participants engaged directly with Speaker. Approximately 40+ students attended the session via Google Meet, gaining valuable insights and motivation for their professional journeys.</p>
<p>18.</p>	<p style="text-align: center;">IEEE activities</p>	<p>We the IEEE St. Joseph's College of Engineering Student Branch Chapter (SBC60101) hosted the event "Voices of IEEE - Glimmer to Glory" on August 20, 2024, featuring Mrs. Leslie Martinich, an IEEE Distinguished Lecturer and Founder of Competitive Focus. The session, held via Zoom, focused on "The Future of Work: Engaged Leaders and Empowered Teams," providing insights into leadership and team dynamics. Mrs. Martinich's presentation emphasized the importance of adapting leadership strategies and empowering teams in the evolving work environment. The event saw enthusiastic participation from students, faculty, and IEEE members, who engaged in an interactive Q&A session. Attendees gained valuable knowledge and were inspired to actively participate in IEEE's professional development opportunities. The event concluded with positive feedback, highlighting its</p>

relevance and the speaker's impactful delivery. Nearly 30 students participated in this event.

19.

ISTE activities

St. Joseph's College of Engineering, (Electrical & Electronics Engineering) **ISTE STUDENT CHAPTER** organized a technical event “**SOLUTION QUEST**” on **01/08/2024**. This exclusive event started at **1:40 PM** with all the members of our club. Abiding the famous quote “**Turning Problems into Possibilities**” the event started exploring the hidden talent of our students. The Solution Quest event is a dynamic and engaging competition hosted by the St. Joseph’s ISTE Student Chapter to foster innovation and problem-solving skills among students. It is designed to challenge participants with real-world problems and encourage them to develop creative, practical solutions. The event started with coordinators presenting problem statements to participants. The participants formed diverse teams to develop innovative solutions over a set timeframe, guided by the coordinators who act as mentors. The coordinators also served as judges, evaluating the solutions based on

creativity, feasibility, impact, and presentation. Awards were given to the top-performing teams

20.

Club activities

St. Joseph's College of Engineering, (Electrical & Electronics Engineering **ELECTRICAL CLUB** organized a technical event “**IDEA INNOVATOR CHALLENGE** “ on 31/07/2024. This exclusive event started at **1.40 pm** with all the members of our club. The **Idea Innovator Challenge** is an exciting competition aimed at fostering creativity and innovation, encouraging participants to transform their groundbreaking ideas into tangible, actionable concepts. **This event offers a unique platform for individuals or teams to present their innovative solutions to real-world challenges, with the opportunity to receive valuable insights and feedback from industry professionals.**

PIC: EVENT POSTER

21.

Club activities

St. Joseph's College of Engineering, Electrical & Electronics Engineering **SOCIAL AWARENESS CLUB** organized a technical event “**DYNAMIC DISCLOSURE**” on 30/07/2024 for IV year students. The group discussion on the topic EV adaption in India, the adoption of electric vehicles in India is supported by a combination of government initiatives, infrastructure development, market growth, and public awareness efforts. These measures aim to address challenges and capitalize on opportunities to promote sustainable transportation and environmental benefits in the country.

(Indexed in Scopus)</p> <p>Abstract: In the modern world, due to changing lifestyles, more people are infected by deadly diseases, especially heart disorders. An early prognosis is the only possible way of increasing <u>survival rate</u>. One of the key elements of this context is the healthcare <u>digitalization</u> that is carried out through <u>Internet of Things (IoTs)</u> and <u>cloud computing</u>. However, main issue in cloud with IoT is false diagnosis, which leads to cause a major impact on patient's life. Moreover, data communication through cloud servers can be compromised by attackers due to security issues. A novel diagnosis approach 'Hybrid Binary Particle Firefly Optimized <u>Extreme Learning Machine</u> classifier (HybBPF-ELM)' to predict HD is designed, that recognize the subject with HD abnormality from the normal ones. The prediction accuracy and time efficiency of training process are improved by the adoption of a Hybrid Binary Particle Firefly Optimizer (HBPFO) through fine-tuning weight and bias of <u>Extreme Learning Machine (ELM)</u> classifier.</p>

Shanthalakshmi, "Enhancing Lung Disease Diagnosis through Meta Learning: A Framework Utilizing Few-Shot Learning Techniques," 2024 International Conference on Advances in Computing, Communication and Applied Informatics (ACCAI), Chennai, India, 2024, pp. 1-6, doi: 10.1109/ACCAI61061.2024.10602349, E ISBN:979-8-3503-8944-9, Print ISBN:979-8-3503-8943-2, Date Added to IEEE Xplore: 25 July 2024. **(Indexed in Scopus)**

Abstract: Ailments of the lungs stand out as the most common medical conditions that are encountered in the healthcare industry. Manual assessment, which frequently involves the use of chest X-ray images and visual inspection, is something that is commonly used in traditional diagnostic approaches. This method can be time-consuming and prone to errors. Deep learning techniques, despite their potency, require a significant quantity of data in order to achieve optimal performance. After the nodules have been segmented, they are subjected to feature extraction by transfer learning. This is accomplished by employing the CheXNet model that has been pre-trained on the Chest Xray14 dataset, which contains 14 chest abnormalities. After the features have been extracted, they are transferred into a classifier, which is then used to distinguish between a variety of abnormalities and normal circumstances. The new component of this research resides in the implementation of few-shot learning techniques within the classifier, allowing efficient image categorization even with insufficient data. A promising strategy to intensifying the precision and efficiency of lung disease diagnosis in the healthcare sector is presented by the technique that has been developed.

Abstract: In agricultural sectors like wheat, paddy, flowers, crops and maize production, insect infestations lead to significant financial losses. Swift identification of the insect species is vital to mitigate economic impacts. However, farmers often struggle to distinguish between various agricultural pests due to their limited experience and knowledge. Tackling this challenge involves harnessing advanced technologies such as the VGG-16 convolutional neural network (CNN) architecture, alongside other computational methods. VGG-16, renowned for its effectiveness in image classification tasks, can be employed to automatically extract features from the data. In our study, we propose integrating VGG-16 as part of a fusion BiLSTM network, which incorporates bidirectional long short-term memory (BiLSTM) layers, considering temporal information. This approach offers a promising solution to insect species identification in agricultural settings.

S. Vedapuri, S. Evangeline and C. Heltin Genitha, "Corporate Tax Compliance and Fraud Prevention System by Principal Component Analysis and Auto-Encoder," 2024 International Conference on Advances in Computing, Communication and Applied Informatics (ACCAI), Chennai, India, 2024, pp. 1-9, EISBN: 979-8-3503-8944-9, Print ISBN:979-8-3503-8943-2, Date Added to IEEE Xplore: 25 July 2024, doi: 10.1109/ACCAI61061.2024.10601922. **(Indexed in Scopus)**

Abstract: Almost all tax authorities prioritize the detection of tax fraud as a means of optimizing their earnings and upholding strict compliance standards. When devising standard tax models and their outcomes, it is imperative for every nation to take into account the prevalence of tax evasion and avoidance, as they can significantly skew tax arrangements. Early models in this field focused on tax evasion, as it was perceived as a challenge to the state’s ability to enforce the law. This study expands on earlier research on tax fraud detection, which used a variety of machine learning models to look at all tax kinds. This model finds a number of variables that are important for identifying income tax fraud in both small and corporate enterprises, such as the length of the firm, its size, and whether it works locally or internationally. It is the first to use Principal Component Analysis and Auto-Encoder to detect corporate tax fraud. The findings of this work will assist scrutinizers in comprehending the elements that lead to corporate tax fraud, hence decreasing the duration and expenses of audits and facilitating the recovery of lost revenue from corporate tax fraud.

**C. Kabilan, S. Madhesh
Kumar and G. Latha Selvi**
Published a paper in Scopus
indexed Conference

Abstract: Diabetes is a dangerous medical condition that have to be identified at early stages if not might produce adverse consequences later. The fundus image of the retina can be effective in understanding the diabetic relevancy and can also produce various other results related to retinal diseases using angiography techniques. To solve this issue, a combination of GAN or Generative Adversarial Networks with VGG can be effective in classifying whether the retina scan input image is affected by diabetes or not. The involvement of GAN with a classification algorithm is entertained due to the imbalance of medical records and the complexity involved with extensive training with CNN, which produces pessimistic results due to the lower number of records. GANs offer a solution to the challenge of sparse data in generating synthetic retinal images. Conversely, VGG stands out as a deep convolutional neural network ideal for image classification tasks. By combining these two techniques, it is possible to improve the accuracy of diabetic retinopathy detection. This approach has the potential to make diabetic retinopathy screening more accessible and affordable, especially in low-resource settings where traditional methods may not be feasible.

V. Elakia, M. Enush and R. Shoba

Published a paper in Scopus indexed Conference

V. Elakia, M. Enush and R. Shoba, "Improvised Secure data transfer through the use of steganography for IoT network node data security," 2024 International Conference on Advances in Computing, Communication and Applied Informatics (ACCAI), Chennai, India, 2024, pp. 1-7, doi: 10.1109/ACCAI61061.2024.10602320, E ISBN:979-8-3503-8944-9, Print ISBN:979-8-3503-8943-2, Date Added to IEEE Xplore: 25 July 2024 **(Indexed in Scopus)**

Abstract: The network of actual physical objects, or items having software, sensors, and other technology implanted in them The Internet of Things (IoT) is a network of interconnected devices and systems that communicate with each other via the Internet to share data. IoT devices should be secured even if many of them are publicly accessible to everyone on the network. The result is a picture file that seems identical to the original but includes typical, unencrypted “noise” patterns data because the encrypted data was applied to this redundant data discretely. The goal of this project is to use picture data hiding to encrypt data from IoT networks by concealing the message within an image file. By using convolutional neural networks, the payload which can be conveyed via a visual will be significantly expanded in conjunction with the conventional picture data hiding approach. To get the maximum payload, various convolutional settings will be examined. The data will be encrypted and decrypted using the recently created deep learning algorithm. In order to improve the payloads of information to be encrypted and securely decrypted for displaying the original message, convolutional networks will be trained in this study.

Guest Lecture	-
FDP/Workshop/Conference	

S.No	Name of the Staff	FDP Title	Organized By	Date
1	Dr.Nanthitha	Indian English Literature: Themes Techniques And Theories	Dr. SNS Rajalakshmi College of Arts and Science	05-08-2024 to 09-08-2024
2	Mr.S.M.Balaji	Advanced Mathematical Concepts & Their Real World Applications	Veltech Ranga Sanku Arts College	05-08-2024 to 10-08-2024
3	Ms.B.Shoba			
4	Dr. P. Priyadarshini	AI for Sustainable Development	VIIT, Pune,	05-08-2024 to 09-08-2024
5	Mr.Chellamani	Foundational Science: The cornerstones of Engineering	Sphoorthy Engineering College Hyderabad	08-08-2024 to 10-08-2024
6	Mr.K.Suresh			
7	Mr.S.Manikandaprabhu			
8	Dr.Arul perum Jothi	Cutting Edge Research and Technologies in signal processing using MATLAB	Department of ECE, MLR Institute Of Technology	12-08-2024 to 17-08-2024
9	Dr.N.Jose Parvin Praveena			
10	Dr.Nancy Delaila			
11	Dr.Arul perum Jothi	Exploring New Horizons in Mathematical Research	Department of Mathematics, V.O.Chidambaram College,Thoothukudi	19-08-2024 to 24-08-2024
12	Dr.G.Meena Devi			
13	Dr.G.Venkat Narayanan			
14	Dr.Jayakumar			
15	Dr.N.Jose Parvin Praveena			
16	Dr.Nancy Delaila			
17	Dr.P.Agilan			
18	Dr.P.Chellamani			
19	Dr.V.Vallinayagam			
20	Mr.S.M.Balaji			
21	Mr.S.Manikandaprabhu	Advanced Informative and Emerging Trends in Teaching and Learning Pedagogy	Institute of Marketing and Management, Delhi, School Of Business Administration, Bhagwan Parshuram Institute Of Technology, New Delhi, Research Foundation of India &	24-08-2024 to 30-08-2024
22	Dr.Nancy Delaila			
23	Dr.P.Agilan			
24	Dr.Arulperumjothi			
25	Dr.N.Jose Parvin Praveena			

				RFI-CARE	
	26	Dr.V.Vallinayagam	Mathematical Methods and its Applications	Kongunadu College of Engineering and Technology (Autonomous), Trichy, Tamilnadu	28-08-2024 to 03-09-2024
				-	
				-	
		Dr. P. Agilan delivered a guest lecture on "Advanced Queueing networks and its applications" at SIMATS on August 1, 2024			
Symposium				-	
Awards/Prize won by staff	Dr.P. Agilan nominated as Editorial Member of GSP Science and Engineering Publishing for the period 06-08-2024 to 06-08-2026				
Awards/Prize won by students					
Industrial Projects done by students

Prepared By,

Department Coordinator
Department

Head of the

Date:

To
The
Principal
St. Joseph's College of
Engineering
OMR, Chennai – 119.

Subject: Brief report on the monthly activities undertaken by **Department of Mechanical Engineering** for the month of **August 2024**.

Respected sir

Referring to the subject as mentioned above, I, Mr.M.Ganesh, the department coordinator NAAC, hereby submit the brief report of various activities of the department.

Description about the various activities undertaken and its corresponding remarks.

Sl No	Name of the Activity	Remarks
		Department of Mechanical Engineering organized 2 nd International Conference Hybrid Mode on " Technological Advancements in Materials, Design, Manufacturing and Energy Sectors (ICTAMDMES 2024) " on 21 st and 22 nd August 2024 Mr V Balakrishnan Advisor Wheels India Limited, TVS Group of

Companies, Chennai was the Chief Guest and inaugurated the Conference.

Dr.Vaddi Seshagiri Rao, Principal, St Joseph's College of Engineering presides the function, welcomed and felicitated the Chief Guest

Dr N Arunkumar Dean Industrial Collaboration IQAC introduced the Chief Guest to the participants.

Dr G L Samuel, Professor, Manufacturing Engineering Section, Department of Mechanical Engineering IIT

Madras **Dr M Venkata Ramanan** Professor Director Institute for Energy Studies, College of Engineering

Guindy Anna University and **Dr G Kumaresan** Professor, Institute for Energy Studies College of

Engineering Guindy Anna University had delivered key note address in the two days of conference

More than 100 research articles have been received and the participants

Have presented their research findings

DEPARTMENT OF MECHANICAL ENGINEERING

GUEST LECTURE BY INDUSTRIAL EXPERT

**SUSTAINABLE DEVELOPMENT
THROUGH INNOVATION
APPROACH : IRON ORE EXTRACTION
FROM GRINDING WASTE.**

 05.08.2024

 01.00 p.m - 03.00 p.m

 BASIL HALL, PLACEMENT BLOCK,
St. JOSEPH'S COLLEGE OF ENGINEERING

IV YEAR STUDENTS

Mr. IA. LEO BERNARD

MANAGER - PLANT ENGINEERING
ASHOK LEYLAND, ENNORE

On 5 th August 2024 the Department of Mechanical Engineering of both the institution hosted guest lecture by an industrial expert on the topic "Sustainable development through innovation approach Iron ore extraction from grinding waste" and the guest speaker was **Mr I A Leo Bernard**, Manager Plant Engineering, Ashok Leyland, Chennai The guest lecture focused on sustainable development through innovative approaches, specifically highlighting the extraction of iron ore from grinding waste

St. JOSEPH'S
COLLEGE OF ENGINEERING
An Autonomous Institution, Affiliated to Anna University

DEPARTMENT OF MECHANICAL ENGINEERING

Guest Lecture
ON
STRATEGIES FOR WRITING A RESEARCH ARTICLE FROM PROJECTS

Guest Spotlight

<p>RESEARCH PROJECTS Completed: 200.00 Lakhs & Ongoing: 80.00 Lakhs</p>	<p>PUBLICATIONS 10 - International Journals 10 - International Conferences</p>	<p>PATENT GRANTED Biomimetic powered autonomous generation of Power, cooling and water</p>

Dr. G. KUMARESAN
Professor
Institute for Energy Studies, CEG, Anna University, Chennai-29
Additional Director
CEG, Anna University, Chennai-29

16 Aug 2024
LIBRARY AV HALL, 01.30 PM - 02.30 PM

The Choice of Disciplined Toppers

On 16 th August 2024 Department of Mechanical Engineering from St Joseph's College of Engineering organized a Guest lecture for third and Fourth year Students on the topic **“Strategies for writing a research article from Projects”** by **Dr G Kumaresan** Professor Institute for Energy Studies, CEG, Anna university, Guindy Additional Director CFR, Guindy was the eminent speaker to the session he gave a clear insight on how to approach a literature review and write a article

Mr D Sakthivel Assistant Professor Department of Mechanical Engineering visited Garuda Aerospace Pvt Ltd and had interaction with Mr Maruti Prasad, CSR Lead, Discussion was made regarding Industry Interaction Activity on 10 th August 2024

Dr R Selvam Dr K M Kumar, Associate Professors from Department of Mechanical Engineering have visited Grundfos Pumps India Pvt Ltd Thuraippakam on 14 th August 2024 had a discussion with Hr Managers for Industrial Visit Intership and Placement

Dr N E Arunkumar Associate Professor Mr G Kasirajan Assistant Professor from Department of Mechanical Engineering have visited SHARDA Motors Industries Limited SIPCOT Industrial Park, Irrungattukottai Sriperumbudur on 16 th August 2024 and interacted with Mr J Saravanan Sr Manager HR, Mr S Prabhu Manager Production Mr P Babu Deputy Manager Production, as a part of Industry Institute Interaction cell (Discussion was made for Student Internship, Industrial Visit, Placement and Industry based Curriculum

On 6th August 2024 52 final year C section students visited Thai Casting Industry along with 2 faculty members From that visit the students had a clear vision on casting process.

On 6th August 2024 54 final year B section students visited Cori Engineering Pvt Ltd Industry along with 2 faculty members From that visit the students had a clear vision on pressure vessel manufacturing

		<p>process using casting and machining</p> <p>On 16th August 2024 54 final year A section students visited RK Heavy Engineering Pvt Ltd Industry along with 2 faculty members From that visit the students had a clear vision on heavy machinery manufacturing process using CNC machines and welding.</p> <p>On 13th August 2024 47 third year B section students visited IGP Engineers India Pvt Ltd Industry along with 2 faculty members From that visit the students had a clear vision on Metal Gasket Manufacturing and Quality tools for validation</p> <p>On 14th August 2024 47 third year C section students visited Grundfos Pumps India Pvt Ltd Industry along with 2 faculty members From that visit the students had a clear vision on pump manufacturing process</p> <p>On 16th August 2024 45 third year A section students visited RK</p>
--	--	---

		<p>Heavy Engineering Pvt Ltd Industry along with 2 faculty members From that visit the students had a clear vision on heavy machinery manufacturing process using CNC machines and welding</p>
		<p>On 7 th August 2024 the Department of Mechanical Engineering hosted distinguished alumni talk on the topic Blockchain Industry 4 0 ""and the guest speaker was Mr Vidyashankar Ramalingam He graduated from our college in the year 2010 and gave us insightful importance on how blockchain can be used to increase the security and transparency around the sharing of customer data, either between a customer and a company or between two companies And also blockchain can also be used to reduce fraud and other trust related issues in digital ad buying He accentuated that Blockchain can also be called as a distributed ledger technology</p>
