Cryptography and Network Security

Cryptography and Network ^{Security} Video was Very Useful. It was more informative. Now we got clear view of Cryptography. They gave introduction to number theory. Classical Cryptosystems was Very Useful. They explained RSA Cryptosystem in detail. I recommend students to see ~~the~~ this video.

Kaviya

AAKASH ARUN KRD

312314104001

The Cryptography and Network theory gives us a very much useful information about Network Security. The clear Introduction to the classical cryptosystem gives a good start about subject. The message authentication code is informative one and their techniques will give elaborative details about them. The RSA cryptosystem must be detailed more wisely. So we can gain much knowledge. The Cryptography System lecture will give us a good learning platform.

Aakash

Cryptography and Network Security

one of the interesting subject. class go more realistic rather book oriented. especially the private key, public key concepts. DNS problems are very interesting and useful for us in ~~real~~ our day today life.

In this cryptography and network security the best part is different technique of hacking. hacking technique so useful and powerpoint explanation, video presentation, seminar are conducted in our class so class was not at all boring very much interesting and useful.

my

cryptology :

The class is about cryptography and Network security. Sections was very useful and very interesting they explained everything in a well manner. They explained the Number Theory and Classical cryptosystem.

And the topics like Message Authentication codes, The RSA cryptosystem. The section was very useful learned many things and they explained lot about the example and with Real time example in detail manner.

~~Ansh~~

Theory of Computation

Theory of Computation Video was Very Good. This Video gave us more information. He learnt many new concepts. The way in which they were teaching was Outstanding. They gave good time examples. They explained what is theory of Computation. They explained regular expressions in detail. Simplification of CFGs and Removal of epsilon productions were very interesting.

Malarika

312815104054

Haini.S

Theory of Computation.

class conducted regularly and staff provide us valid information about the topic. It was very useful and interesting - notes for each topic is provided at class itself.

After each chapter completion a detailed overview about the topic and important information, extra informations are provided by the staff.

especially the topic pumping lemma is done in practical very much useful to real-world examples.

In this subject the best part is the computation works very interesting and updated version useful for us.

M

THEORY OF COMPUTATION

312315104141

RAGHU NANDHAN D

The Theory of Computation Video Course gives a in-depth about the Subject, The way we learnt was a fruitful especially in the topics of Regular Expressions, epsilon transition, Simplification of CFGs, Removal of epsilon production, which brought us computer them real world concepts. The lecture on lemma proof and their examples and converse of lemma are very useful and knowledgable to us. It induce our interest to learn more about the Computation and their concepts.

Vinothini J
312315104198

Theory of Computations:-

Class was good with good explanation learned many things about Theory of computation. detaily they explained on Regular expressions, class was very interesting and really useful. learned many thing in depth about completing of pumping lemma proof, different examples about the pumping lemma. They also explained about simplification of CFGS continued.

Each and every topic covered well with Real time examples. And the class was very useful to learn the subject detaily.

~~Vinothini~~

Computer Architecture.

312318104006
Abinay.T

Computer Architecture very interesting and useful especially the case study problem of memory hierarchy, data allocation, multicore are very useful for our final year project.

class was more of interaction doubts are cleared by read and daily problems are solved based on the memory allocations.

Computer architecture subject are very useful for our further studies and interesting topics.

powerpoints, seminar, group discussion are done in our class on regular basis. problem solved daily so that it early register for us.

By

Jerry Antelin v

212316104068

Computer Architecture:

The NPTEL class is about Computer Architecture they explained everything about the subject in detail manner. The session was very useful the class is ~~is~~ about the topic as case study with MIPS-I they explained with real time example and was very useful. They detaily explained about the Dynamic Scheduling and speculation with Real time example in detail manner with Next example session was very useful.

Jerry

Sivas

31316#04170

Computer Architecture

Computer Architecture video was very useful. It was very informative. They explained case study with MIPS-1.

They explained dynamic scheduling, speculative execution with real time example. I strongly recommend to see this video to students.

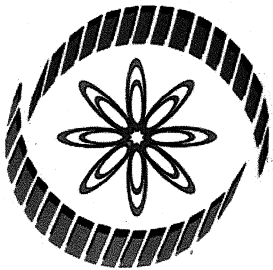

Sivas S

RAMAN RA

3123316104133

The NPTEL course on Computer Architecture give us a strong foundation about the subject. The case studies in MIPS will provide a real world knowledge about them which also help us to manage with our regular learning task. The Dynamic Scheduling and Knowledge about it.
